

Dear pride of the Institute,

I am enthused to write this letter to update you about the *Alma-mater*, G.V.P. College of Engineering. We will also be very happy to be updated with your profile along with e-mail address so that it will be a source of inspiration to the present students to plan and grow in their career.

Now the College has seven branches, all the high-tech branches are having 120 intake. The other core engineering branches will also have 120 students each from the next academic year. Six Engineering branches have P.G. Programs and from the next academic year ECE will also be having P.G. Program. Shortly the College will be conferred with autonomous status and the College may become a University next year. Many of your teachers either acquired Ph.D. or about to. Some of your friends' correspondence to them is making us happy. Hope you are one among them.

The College welcomes you to share your moments of happiness or your treks onto new ventures/avenues/technologies. When shared, there will be a real contribution to the Institute and our younger brethren.

We wish the Alumni to open their activities at Hyderabad to all our friends on 21st March, 2009 through a second meeting in Hyderabad. We are looking forward to meet and greet the group at Bangalore and abroad as well at a later date. The College will be happy to provide accommodation in the Hostels/Guest House whenever you visit the College.

I am enclosing a feedback form. Please give the necessary information. If you want us to keep your personal information confidential, we will do so and will process without your identity.

Wishing you all the best in all your current and future endeavors and personal life,

Prof. P. Soma Raju,
Secretary, Gayatri Vidya Parishad
